PROFILE

Frontend engineer building e-commerce products with Vue.js, React and TypeScript, from sign-up flows and customer accounts to checkout and the A/B experiments behind them. Uses AI agents every day, with automated code review and lint, type and test checks on every change.

SKILLS

Languages
TypeScript, JavaScript, Python, SQL

Frontend
Vue.js, React, Next.js, React Native, Tailwind CSS

Testing
Vitest, Playwright

Platforms
Shopify, GraphQL, REST

PROFESSIONAL EXPERIENCE

Yari Labs, *Frontend Engineer*
09/2025 – Present | Braga, Portugal

- Develop and maintain a Vue.js and TypeScript application on Shopify, owning features from spec to release.
- Run A/B experiments and integrate external platforms (Shopify APIs, analytics, CRM, fraud prevention) to deliver new business capabilities.
- Improve performance, accessibility and reliability through front-end audits and production error monitoring.
- Write technical spikes and recommendations, working closely with the client, backend and data teams.
- Set up an AI-assisted development workflow: parallel agents, automated code review and CI quality gates.

Yari Labs, *Frontend Engineer Intern*
06/2025 – 07/2025 | Braga, Portugal

- Built responsive analytics dashboards from Figma designs with Vue.js, TypeScript and Tailwind CSS.
- Integrated REST APIs and improved performance with lazy loading for high-volume data.

PROJECTS

BiteFinder, ShiftAPPens hackathon (team)
App that helps a group of friends agree on where to eat, with AI recommendations built from restaurant data. React Native, Python.

F1 Hub, BugsByte hackathon (team)
Formula 1 hub with driver stats, news and AI-driven driver comparisons. Next.js, Tailwind CSS, Python.

EDUCATION

Bachelor's in Software Engineering (Licenciatura),
Universidade do Minho
2023 – 2026 | Braga, Portugal
Relevant projects: student scheduling platform in Vue.js · data analysis system for a music streaming service in C · distributed network monitoring in Python

LANGUAGES

Portuguese (native)

English (advanced, C1)
